

Renewables Installer Finder

How to register and publish your profile?

Please note: Only MCS certified installers operating in Scotland can register on the tool.

To register you just need to enter your MCS registered email address and create your own password.

You can register from this link: <https://rifinstallers.est.org.uk/Register.aspx>.

When you agree to the Terms & Conditions and hit 'Register' this will automatically send a confirmation message to your email address. You then need to click on the confirmation link in the email.

Confirmation of your email address will only activate your profile but it doesn't mean your profile is published and visible to the public.

At this point you need to login into your company's profile using your email and password, here <https://rifinstallers.est.org.uk/Login.aspx>:

1. Please login to your account using your MCS registered email and password. Once logged in you will see a preview of your profile which allows you to edit fields on the 'Edit Profile' tab.
2. Go to the 'Edit Profile' tab and enter all the information you wish to be displayed.
3. Then press 'Preview and save'.
4. At the top of the form you'll see an 'information' diamond. Here you have to select the tick box to agree that you've read the disclaimer and agree to our Terms & Conditions of Use.
5. Then click 'Publish profile'. As soon as you do this your profile will appear on the public site. (If you don't click 'Publish profile' the edit you have made will not appear on your public profile).

To check you have published successfully you can go to the tool and search for your company on <https://rif.est.org.uk>.
