

Working together to support and develop the sustainable energy supply chain

We all want to save money on energy. Advice and financial support from government and energy companies has never been greater. However, for energy saving improvements to be realised, householders and businesses need to access high quality, professional services, assessments and installations. This is where the Energy Saving Trust can help by working with trade bodies, certification bodies, distributors, manufacturers and other key organisations involved with the sustainable energy supply chain.

Why work with us?

We share knowledge, know-how and support activities to keep each other informed about:

Finance mechanisms

Market trends

Training and certification requirements

Together we can achieve common aims and objectives, ensuring Scotland has a professionally competent work force.

What we do...

The Sustainable Energy Supply Chain programme is funded by the Scottish Government and managed by the Energy Saving Trust.

We can...

- ✔ **Bring businesses together** to ensure they can benefit from the opportunities available and have the skills and certifications to take part in the energy efficiency and renewables market.
- ✔ **Help businesses of all sizes and across all sectors in Scotland.** Our advice and support is suitable for any Scottish business committed to high quality, effective and professional assessments and energy efficiency/renewables installations.
- ✔ **Identify barriers** stopping businesses getting involved in this market and working with industry to address these.

We do these through...

Events and webinars

Stakeholder updates and briefings

Newsletters

Up-to-the-minute online resources

Providing training and CPD courses

Forums

Informing your members/clients about developments in this sector

Working together

If you'd like to join us in strengthening the sustainable energy supply chain, then we'd love to hear from you.
