

Grey Fleet Review

Do your employees use their own vehicles for business purposes? This is known as 'grey fleet', and has significant financial, environmental, air quality and safety implications, all of which can be mitigated with the help of our Grey Fleet Review.

A recent report produced by the Energy Saving Trust in conjunction with the BVRLA estimated that Britain's grey fleet is responsible for 3.6 million tonnes of CO₂ per year, 8,156 tonnes of NO₂, and £5.5 billion worth of potentially unmanaged costs from mileage claims and car allowances.

Our Fleet Support Managers can carry out a Grey Fleet Review for your fleet, analysing travel policy and journey data to model the profile of the fleet and the costs and emissions resulting from grey fleet use.

The review will take the form of a detailed report, providing:

- ▶ a profile of the vehicles being used as grey fleet
- ▶ an introduction to a travel hierarchy and how this can be used
- ▶ potential alternatives to grey fleet such as daily rental, public transport, walking, cycling or car clubs
- ▶ duty of care implications
- ▶ advice on the effective use of pool cars, daily rental and car clubs

- ▶ recommendations for reducing emissions from the remaining grey fleet
- ▶ potential financial and emission savings.

Am I eligible?

This review is available at no cost for most private and public sector organisations in England.

To apply for a Grey Fleet Review email fleetadvice@est.org.uk
